38 Mappin Street: Workroom 3

09.00-15.30

80 places available (Y9/Y10)

Book a pre or post visit at your school or college

Polyhedra are three-dimensional shapes made out of polygons. You will discuss how they work, build a few, and discover a surprising fact when we start looking at what we've done. At the end you will learn why this is useful for modern scanning techniques. You will also explore careers related to STEM degree subjects and how valuable these skills can be in the world we live in

An interactive and fun filled day where pupils will experience a range of clinical skills in the medical field. Workshops will be led by undergraduate students studying medicine, participants will explore what medicine really involves and the many career paths in the health sector.
